To: Customers and Truck Companies loading at GrainCorp sites

Re: GrainCorp Website Road Freight Page Updates

GrainCorp publishes information for trucks loading at GrainCorp sites on the [Road Freight](#) page of the GrainCorp website

Following the recent updates to Time Slotting, a new Freight Provider Manual is now live on the website.

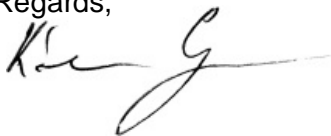

The new manual includes procedures for all trucks on how to use GrainCorp's Time Slotting system, including how to use the recent permits update, together with further detail for trucks that subcontract directly to GrainCorp who use the CropConnect Carrier Portal.

New versions of the GTSN Truck Chart and Truck Books are also available. Highlights include new truck codes and how the National Class 2 Performance Based Standards (High Productivity) Authorisation Notice 2022 (No.3) applies in the grain industry in NSW and Victoria.

Other information applicable to trucks loading or unloading at GrainCorp sites is also available on the page.

For any questions or feedback about the change, please contact Time Slotting on 1800 809 482 (opt 2).

Regards,

Kieren Gardner
GrainCorp Road Compliance Manager
